

Dovre Side Panels

SP1, SP2 & SP3

For Use with DV-1800W/DV-2700W/DV-2000MFR

Assembly & Installation Instructions

For use in GB, IE (Great Britain and Eire)

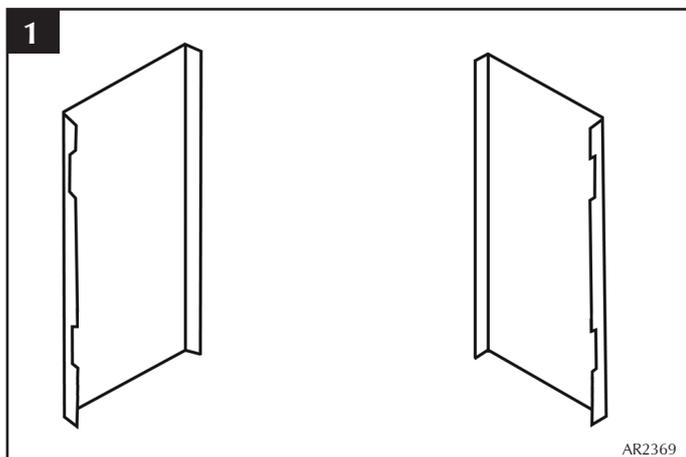

This appliance has been certified for use in countries other than those stated. To install this appliance in these countries, it is essential to obtain the translated instructions and in some cases the appliance will require modification. Contact Stovax for further information.

ASSEMBLY INSTRUCTIONS

GENERAL

The three Side Panel sets have been built to suit various Dovre appliances; These include the 1800 Mini, 2700 Standard and the 2000 Super.

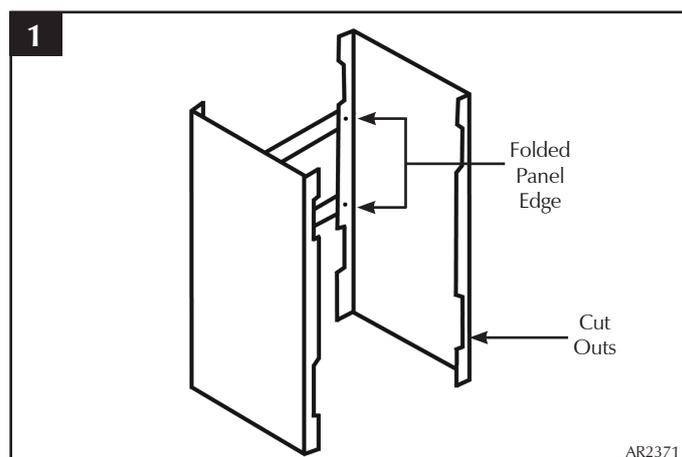

The SP1 fits the 1800 Mini
The SP2 fits the 2700 Standard
The SP3 fits the 2000 Super

Before assembling, make sure you have the correct panel set to suit your stove. If in any doubt seek the advice of your dealer.

INSTALLATION

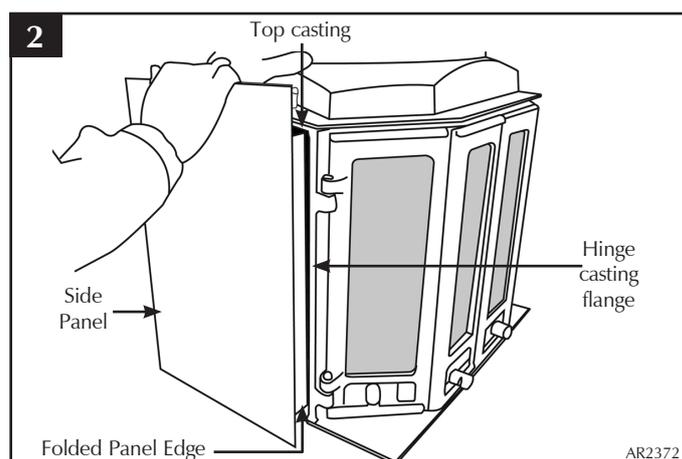

The side panel units are designed so that they may be used with or without a Dovre base plinth fitted. This is achieved by using two sets of cut outs on each of the folded edges of the panels.

- 1.1 Line one of the panels up against the side of the installed appliance to determine which set of cut outs will match the contours.

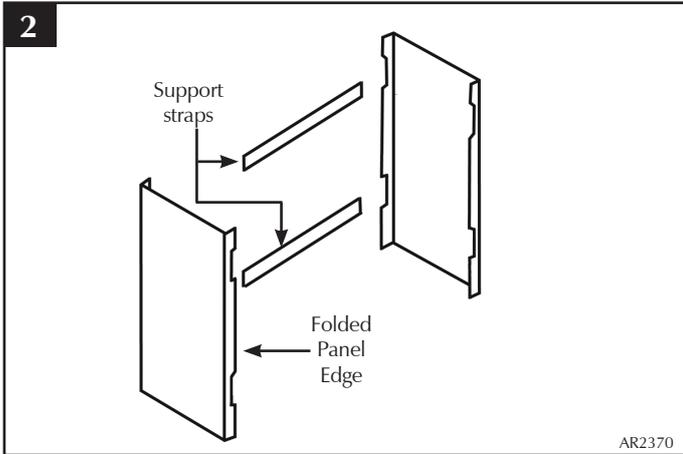

- 1.2 The folded edge of the panels tuck behind the hinge casting flanges; The cut outs fit around the join of the hinge flange and top casting.

Note: The cut outs do not fit around the hinges of the stove.

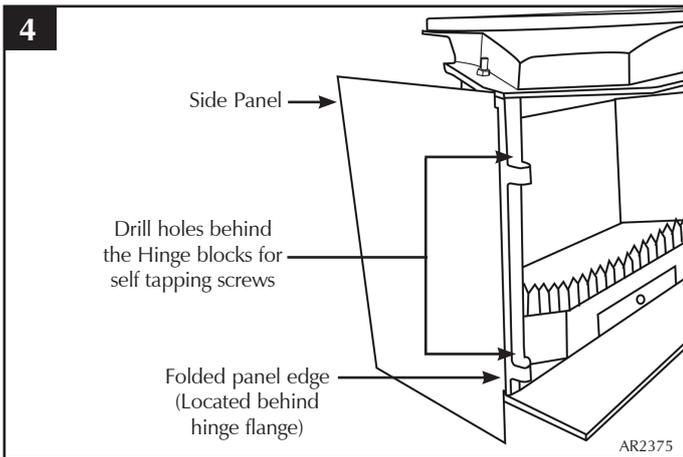

- 1.3 When the panel has been located, attach the support straps (One for SP1) at the back of one of the side panels with the fasteners provided.

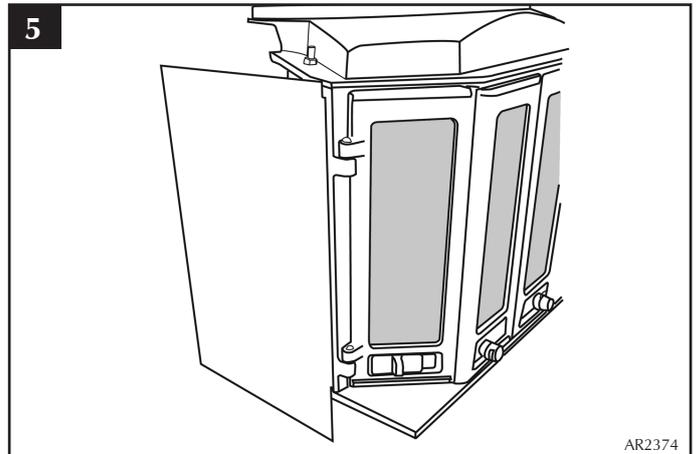

ASSEMBLY INSTRUCTIONS

- 1.4 Remove the doors.
- 1.5 Drill 2 holes on each side just above the hinge block on the front of the flange. Ensure the hole is the correct size for the self tapping screws used.

- 1.6 Remove the panel from behind the flange.
- 1.7 Drill a clearance hole through the casting and make a counter sink hole on the front of the hinge flange.
- 1.8 Replace the panels and secure with the self tapping screws.
- 1.8 Replace the doors to finish installation.
